

# Toki Pona x Pictiq - pilot semantic crosswalk

20 words | research artifact | no lexical-equivalence claim

Toki Pona compresses broad lexical concepts. Pictiq compresses short communication through intent and context.

Example: telo is not equal to need\_water; the tile is narrower and already intent-oriented.

| TOKI PONA | MEANING                                                               | SITELEN PONA                                                                                   | SITELEN EMOJI                                                                         | PICTIQ                                                                                                    | MATCH      |
